

## Aims of the pages

<https://www.mit-musik-gegen-atomkrieg.de/>

### Musicians engage against the threat of nuclear war and climate change

The aim of this initiative is to improve awareness among the population about the risk of nuclear war and to reach many people in this way. These pages are intended to draw attention to the risks, but no political demands are associated with them.

Various organisations of the peace movement repeatedly collect signatures for petitions with concrete demands. Such a collection of signatures is not the aim of these pages. This is because, on the one hand, there can be different opinions regarding concrete demands, and on the other hand, these are only valid for a certain period of time. A signature list for specific demands can no longer be used if demands are changed at a later date.

In order to reduce the risk of nuclear war (possibly by mistake), a permanent worldwide movement will probably be necessary over many years, in which the population is sensitised to the risks of nuclear war. In this sense, it would be important that very many musicians participate permanently and appear on the supporter list, as well as provide their own indications (see <https://www.mit-musik-gegen-atomkrieg.de/gb/mitmachen>). Therefore, the list of supporters <https://www.mit-musik-gegen-atomkrieg.de/gb/unterstuetzer> should be open to as many people as possible, regardless of their political views. Supporting these pages is therefore not about "politics", but about the effort to sensitise the population to the risks of nuclear war and thus to contribute to reducing this risk. Because a nuclear war (possibly by accident) could mean the end of humanity.

Those who wish can of course also express concrete demands on their own pages or refer to corresponding pages of the peace movement with such demands.
